

EditMule Filter Remover READ ME

EDITMULE Filter Remover (EMFR). Version 2.0, May 16th 2010

EMFR is a program that finally allows users of FCP to strip individual filters out of sequences.

New to this version

- Much quicker processing of sequences.
- A simpler registration process
- Now compatible with versions 6 and 7 of Final Cut Pro, as well as version 10.6 of the Mac Operating System (Snow Leopard).

Minimum System Requirements

- A Macintosh computer with a 1.25GHz or faster PowerPC G4, PowerPC G5, Intel Core Duo, or Intel Xeon processor
- 1GB of RAM
- Mac OS X v10.4.11 or Mac OS X v10.5.5 or later
- Final Cut Pro 6.0 or higher

Installation notes

- This DMG contains a demo version of EMFR that expires 14 days from installation. If you choose to buy EMFR after the trial period is over please either follow the instructions to buy the app, or visit www.editmule.com. Upon purchase you will receive a serial that will activate your app and lock it to the machine you have installed it to.
